The Energy Access Practitioner Network, numbering over 2500 members globally, supports market-led decentralized energy applications towards achieving universal energy access by 2030. The Practitioner Network catalyzes energy service delivery by promoting new technologies, adoption of quality standards in technology and delivery, and innovative financial and business models. The network is open to all organizations and individuals actively involved in the implementation, development, financing, and management aspects of delivering electricity sustainably, affordably, and effectively.

Not a member? To join the network or update your information, please visit [www.energyaccess.org](http://www.energyaccess.org).
